

Environmental Security Solutions

Save Energy Save Cost

How can Securitas help?

Our environmental patrol service is designed to reduce any potential, unnecessary or excessive energy waste.

With regular patrols our fully trained mobile patrol officers will be able to act on anything that could cause these losses to build up.

This service will be carried out within the areas that we have been agreed with you. We will also provide you with accurate reports of what actions we have taken.

Just some of the areas that we can help include:

- Turning lights off when not appropriate
- Switching off equipment when not appropriate
- Turning off running, dripping taps
- Computer screens turned off

Prevention & Cure with Real Added Value

Improved Flexibility

Our real time reporting system will allow us to email you a full report on completion of all patrols, enabling you to act quickly to prevent further losses.

- Switching lights off could save you 10% of your current light bill.
- Switching off non-essential office equipment overnight saves enough energy to run a small car for 100 KM's
- A computer monitor left on 24 hours will cost around €45 per year. Switching it off out of hours reduces this to less than €10 per year, and prolongs the lifespan of the equipment.
- A photocopier left on overnight uses enough energy to produce over 1,500 copies
- Office equipment left on during bank holidays and weekends could cost small and medium sized office based businesses nearly €60,00 over the course of a year.
- Lighting an office wastes enough energy to heat water for 10,000 cups of tea
