

# Remote Entry/Exit Management

## Never be taken by surprise

Page 1 of 2

Keep your entrances secure day and night with fewer man-hours. That's possible thanks to cameras, software and operators working together to stop suspicious activity in its tracks. From the morning rush to late night deliveries, remote entry/exit management from Securitas helps you avoid unwelcome surprises.

Using strategically placed cameras, Securitas operators keep watch over your entrances during critical situations, ready to intervene should the need arise. Since operators can visually verify an incident, there's no delay in dispatching help when you need it.

Intelligent analytics can prevent trouble any time of day by monitoring footage in real-time and triggering human intervention based on pre-defined criteria. Not only do analytics automatically flag intrusions, they notice more subtle behaviour like a person or vehicle trying to sneak through a checkpoint behind authorized personnel. They can even make access control run more smoothly with license plate recognition and automated authorization.

### Advantages of remote perimeter protection

- 24/7 surveillance of all entry points at a low cost
- Prevent incidents with software that analyzes footage in real-time (optional)
- Reduce shrinkage with monitoring that ensures back doors are used only for authorized purposes
- Safer for after hours activity like vendor deliveries or cleaning crews
- Allow access for guests (vendors, inspectors) remotely with no need of personal escort
- Simplify incident follow-up with documented evidence for insurance/legal proceedings

#### Partner network brings together industry's best

Securitas has global agreements with some of the security industry's top innovators. This allows us to deliver the best possible technology and services in simple, cost-effective packages. Some of our key partners are Milestone Systems and Axis Communications.

#### The industry's most advanced portfolio of security services

Remote video solutions managed by Securitas give you state-of-the-art security in innovative and cost-effective service packages. Cutting edge cameras and software create real-time security that prevents incidents, optimizes security officers' time and reduces costs - no new investment required.

"Since operators can visually verify an incident, there's no delay in dispatching help when you need it"

Remote video solutions cover patrolling, escorts, alarm verification, entry/exit management, perimeter protection, business intelligence applications and more. And since our agreements always include proactive upgrading, security is one challenge you can rest assured is covered.
