

# Remote Perimeter Protection

*Surveillance that thinks fast to keep you ahead of trouble*

Page 1 of 2

**Cut both the number of incidents and your security costs with remote perimeter protection managed by Securitas. We customize intelligent video analytics to each unique location to automatically recognize potential threats - before an incident occurs. And with fixed, pan, tilt, zoom (PTZ) and thermal cameras, you have complete coverage of every angle, day and night.**

With the advantage of real-time security, break-ins, theft and vandalism can all be greatly reduced. Operators are alerted the moment there is suspicious behaviour near your perimeter, allowing us to head off trouble before it starts. We also actively optimize the system over time to deter another persistent threat: false alarms.

Not only do you save money by eliminating unnecessary call-outs, intelligent software that's always on the look-out lowers demand for an on-the-ground guard presence. Remote perimeter protection is remarkably efficient because we manage the entire chain from technology, to operators, to on-the-ground response. That allows us to provide complete protection for one competitive monthly fee - no major investment required.

## Advantages of remote perimeter protection

- Pro-active security stops incidents before they happen
- 24/7 coverage of all perimeters with fewer man-hours
- Cost-effective even if you have many sites in remote locations
- Cameras and software notice things human operators miss
- Simpler legal/insurance process after incident
- Access to cutting edge technology with no major new investment
- Vastly reduce number of false alarms
- Ongoing optimization to reduce costs
- Part of a comprehensive service portfolio

## How remote perimeter protection works

- In-depth analysis of your security situation
- Expert guidance in choosing ideal equipment and placement
- Cutting edge fixed, thermal and pan, tilt, zoom cameras
- Cameras connected to a Securitas monitoring centre
- Open platforms allow integration of existing equipment
- Intelligent video analytics customized to your specifications
- Automated zone intrusion detection
- Speaker system for voice intervention
- Remotely arm/disarm alarm to reduce call-outs
- Video verification of all alarms (alarm verification service)

### Partner network brings together industry's best

Securitas has global agreements with some of the security industry's top innovators. This allows us to deliver the best possible technology and services in simple, cost-effective packages. Some of our key partners are Milestone Systems and Axis Communications.

"Operators are alerted the moment there is suspicious behaviour, allowing us to head off trouble before it starts"

### The industry's most advanced portfolio of security services

Remote video solutions managed by Securitas give you state-of-the-art security in innovative and cost-effective service packages. Cutting edge cameras and software create real-time security that prevents incidents, optimizes security officers' time and reduces costs – no new investment required.

Remote video solutions cover patrolling, escorts, alarm verification, entry/exit management, perimeter protection, business intelligence applications and more. And since our agreements always include proactive upgrading, security is one challenge you can rest assured is covered.
